DAY, MAY 05

# ACTIVITY

On the 7th Hand Hygiene Day, We have taken this opportunity to present few Facts and the importance of Hand washing for all of. To adhere to the COVID protocols, and the current ongoing condition, we gave come up with an idea to share about Hand Hygiene through an Engaging Video.

We have included few facts, the importance of hand Hygiene, along with the correct Steps to wash hands in it.

The video was shared to the NGO's we are associated with, and they have shared it to the kids, and enlighten them on the same. Moreover, the video was shared to all our staff and on Social media, so maximum people can be benefited.

Thank You

Thank You

# Hand Hygiene Day

5<sup>th</sup> May 2021

# Announcement and Activities planned

**CROWNE PLAZA**  
AN IHG® HOTEL  
CHENNAI ADYAR PARK

**Wash Your Hands!**

**Hand Hygiene Day -5<sup>th</sup> May 2021**

- Germs can survive for up to three hours on your hands.
- There are between 2 to 10 million bacteria on your fingertips
- Your hands spread 1,000 times more germs when they are damp than when they are dry.
- Handwashing with soap reduces the risk of diseases by 42-47%
- Lack of access to sanitation and poor hygiene contribute to deaths caused by diseases.

Dear All,

Hotel Association of India (HAI) launches its first “**Hand Hygiene Day**” on May 5<sup>th</sup>, 2014 to create awareness about the importance of frequent washing of hands and to promote wellbeing.

We have planned few activities on 5<sup>th</sup> May for all at Crowne Plaza Chennai Adyar Park.

## Activities planned

1. Poster to create awareness in the hotel
2. Hand washing quiz for all to participate
3. Conduct Hand washing training during briefings for all the colleagues – 10 min trainer document
4. Hand washing videos screening at Cafeteria

**HOD's and Departmental trainers – Please take up hand washing awareness during briefings. I am attaching the 10 min trainer module along with a quiz questions.**

Effective hand washing training was conducted by all the Departmental trainers

Our purpose is to create  
**Great Hotels Guests Love**  
through providing  
**True Hospitality** for  
everyone

This program introduces  
colleagues to the new Corona  
Virus which was discovered in  
China. The ways to identify  
symptoms, prevent and how to  
stop the spread of the virus

## EFFECTIVE HAND WASH

COVID-19 virus primarily spreads through droplet and contact transmission. Contact transmission means by touching infected people and/or contaminated objects or surfaces. Thus, your hands can spread virus to other surfaces and/or to your mouth, nose or eyes if you touch them.

Proper handwashing not only reduces the spread of Coronavirus (COVID-19), it can prevent the spread of other viral illnesses such as cold and flu. Handwashing also reduces the risk of getting other easily spread infections, such as **SARS** (severe acute respiratory syndrome) and **MERS** (Middle East respiratory syndrome).

**Hand Hygiene** is one of the most effective actions you can take to reduce the spread of pathogens and prevent infections, including the COVID-19 virus.

Community members can play a critical role in fighting COVID-19 by adopting frequent hand hygiene as part of their day-to-day practices.

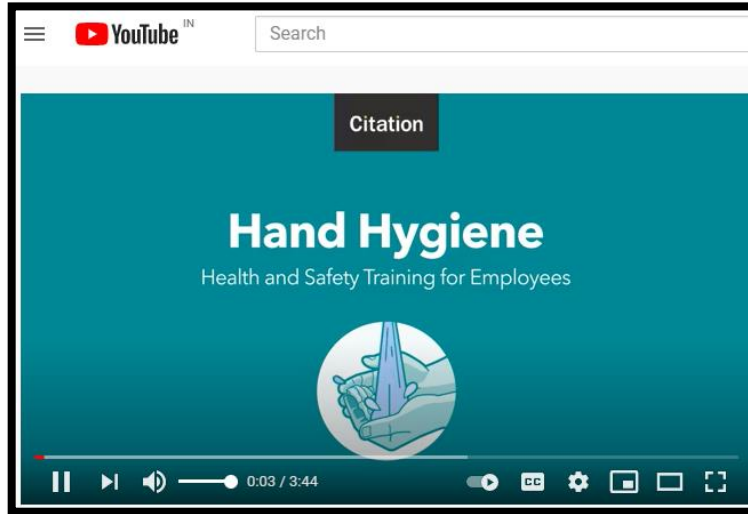

Posters were displayed in all areas on awareness on handwashing

# Videos played at colleague cafeteria for awareness during Lunch and Tea time
