## Q&A WITH CHEFS ABOUT HAND HYGIENE

Taj Lands End, Mumbai

An interactive Q&A session with our kitchen team to learn, ask and understand the importance of **clean hands** in keeping food safe.

### QUESTIONS I ASKED

- 01 When should you wash your hands in the kitchen?
- 02 What are the 6 key steps of handwashing?
- 03 Why is hand hygiene important even if hands look clean?
- 04 What can happen if we don't wash our hands properly?
- 05 How long should we wash our hands for?

### ANSWERS & KEY TAKEAWAYS

-  Wash hands at key times: before cooking, after handling raw food, after using the toilet, after touching face or any contaminated surface.
-  Follow 6 key steps: Wet, Lather, Scrub, Rinse, Dry, Turn off tap with towel.
-  Germs are invisible. Proper hand hygiene prevents foodborne illness and keeps everyone safe.
-  Germs can spread, causing food contamination, illness, complaints and reputation damage.
-  Wash for at least 20 seconds – that's the right time to remove germs effectively.
